GOLD IN EGYPT.

THE RECENT IMPORTANT FINDS.

The recent discovery of gold in the western owen is of the first importance not only to the interests of the Corporation of Western Egypt but to the general development of the mining industry of the country. It affords a first indication of the actual direction in which the gold has drifted that must have been gooded from the eastern hills during wast geological periods before man appeared in the Nile Valley, and also, of the probable manner of its denomination.

deposition.

So fr as the immediate interests of the Corporation are concerned, 2 dexts per too may not seem, at first sight, to be very important; but it is to be reisambered that the gold is contained in pyrites which from generally more than one-teath of the phosphate rock. This rock mustin any case be pondered to be commercially negled, and when this is done-the pyrites can be apparated with very little expense, while the richness and commercial value of the phosphate are greatly enhanced by its removal.

The superskind pyrites abould then carry from half an connex to an ounce per too, and will be valuable as a source of sulpher and sulphurio scid. In addition to yielding this amount of gold. It will also be necessary to enjoir what has become of the gold that has watchered out of the extensive phosphate outcops since the gosses were first formed or since their formation commenced.

It is impossible to say at present exactly So for as the immediate interests of the

their formation commoned.
It is impossible to say at present exactly where it may be found, but it is at least permissible to hope that it is held within the cases area. Another point to be considered is what indication this discovering the "deep least" which very possibly suit between this go'd belies of the Extern hills and the cases. The discovery of such leads would give a new impoles to Egyptian mining, and might result in most important developments.

ASSOUAN RESERVOIR

The adjudication on tenders for the protective works downstream of the looks at Assonan Reservoir has been settled in favor of the following contractors:

EXPEDITION FOR STUDYING THE NILE CATARACTS.

It has been decided to make a complete and detailed survey of the Nile cataracts, south of Wady-Halfs, and to study the possibility of constructing another dam and reservoir, somewhere to the south of the enisting one. Such a supplementary work will probably be necessary, under any circumstances, even should the Amonand dam be raised, as the fastere wants of Egypt will necessitate a very large amount of water being stored. In any work of the kind, constructed south of Wady-Halfs, a nerigation channel and locks may be conitted, as, with the railway trum Wady-Halfs to Eghartoum, no through river traffic is likely to arise, more especially as, on this reach of the river, it must always be difficult and dangerous, and only possible during flood.

CAMPING OUT IN EGYPT.

There is some probability of the neighbourhood of the Ghreah pyramids becoming a favorte site for a residential European test dwelling solony. The Pablis Security Dynariment of the Ministry of the Interior has determined that these quanters abould not be permitted to pitch their tents there just as they please, and a notice has been issued whrien it is stated that it is forbidden to erect tents in the vicinity of the Ghresh pyramids without a permit from the Ministry of the Interior.

Interior.

Applications for such permits must be addressed to the Minister of the Interior. The name and surname of the applicant, nationality, occupation and nesidence, together with the number of tests, the site on which they are to be erected, and the period for which the permit is required, must be mentioned in the application.

This regulation is also to apply to the erection of tests in the neighbourhood of monuments of the past at Assonao.

QUIET AT ALEXANDRIA.

ACTION OF AUTHORITIES.

Yesterday no incident occurred at Alaxandria to distorb public security, but the state of mind of a large portion of the Boropean population is by no means tranquil. As an example of this feeling of insecurity, we may instance the run on the shops of the general that yesterday. The police authorities thought that yesterday, The police authorities thought that yesterday the panic had to all appearances common twisted that it would be parasimille to allow the guannish's establishments to be respond. But as cots as the desistion of the authorities became known, there was a great rush to buy arms on the part of Boropeans and a big rade was done in recybries and other weapons. The authorities desied therefore to again order the olong of those shops, and this did will panalis so until further potter.

The police authorities are quite antified that the attitude of the natives is peaceful, and they are in fact quite cowed. But the authorities state that they are afraid of the Europeans in their present genited state, and believe that if there is any renewal of the distorbance it will be provoked by the Boropeans. "All Alma" asys that the English want to use the disturbance as a laver to obtain more power than before, and both "All Lows" and "All Alma" and the Mixed Courts should be made competent in the case of European criminals. This view is opposed to that of Lord Commer, who state in his last Report that "The proposal to transfer criminal juricidicition over R tropeans from the ounself to the Mixed Courts is not one which the Eritide Government could, under present circumstances, view with favor, nor one which they could addrise the Egyptian Government to accept."

ARMY OF OCCUPATION.

There have been many rumours since Sun-day as to an approaching increase in the strength of the Army of Occupation, especially as regards the garrison at Alexandria. We have, however, been unable to obtain any official confirmation of these rumours.

Vade Mecum for the Homeward Bound.

TO O'R VISITORS.

The Equptian Gazette has much pleasure in presenting to its subscribers the accompanying description of some of the many interesting routes by which they may travel homewards. Accurately and countiedly as possible, and it will be found that none of them are fraught with difficulty. In 'choosing the route home there are several things to be considered. To begin with there is the difference in climate between Egypt and the 'arrivour points at which you may arrive in Europe.
